DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 March 2007 has been entered.

Allowable Subject Matter

2. Claims 1-6 and 16-25 are allowed.

3. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows or suggests a field emission device comprising, in addition to other limitations of the claim, a gate electrode including a cylindrical electrode part that forms a focusing electric field from the gate hold toward a proceeding path of an electron beam emitted from an electron emitter, wherein the focusing electric field is axisymmetric with respect to a central axis of the electron beam. Due to their dependency upon independent claim 1, claims 2-6 and 16-17 are also allowable.

4. Regarding independent claim 18, the prior art of record neither shows or suggests a field emission device comprising, in addition to other limitations of the claim, a gate electrode including a cylindrical electrode part having one end closer to the substrate that has a smaller radius and another end further from the substrate having a

larger radius, wherein a surface between the one and the other end such that upon application of an electric field, a converging electric lens is formed at a proceeding path of an electron beam emitted from an electron emitter and wherein the electric lens is axisymmetric with respect to a central axis of the electron beam. Due to their dependency upon independent claim 18, claims 19-25 are also allowable.

5. The substrate gate electrode structure described earlier is provided for improving color purity, brightness, and durability of the field emission device. The design is new and unique to the art.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
